

ECONOMICS - TRANSFER MAJOR

Faculty Adviser

Peter Cunningham: 503-491-7023 | Room AC2677
| Peter.Cunningham@mhcc.edu

Economics studies how wealth (or “goods and services”) is produced, consumed, and transferred. Students who take EC201 and EC202 at MHCC report that it improved their critical thinking skills.

Those who want to pursue a four-year degree in economics should work with their transfer college and an MHCC adviser. These students can continue to law school, business, political science, and more.

Transfer Outcomes

The primary objective of MHCC’s transfer programs is to fulfill general education requirements and prepare students for transferring to bachelor’s degree programs. MHCC identifies the following core institutional outcomes as program outcomes for its transfer programs:

- Communication
- Cultural competence
- Quantitative reasoning and analysis
- Information literacy
- Critical thinking and problem solving
- Skills to promote personal wellness
- Civic and social responsibility

Students interested in pursuing the Economics major can complete the following courses toward the Social Science requirement and/or electives on the AS (<https://catalog.mhcc.edu/degree-certificate-requirements/as/>) (recommended if pursuing a Bachelor of Science degree), ASLA (recommended if pursuing a Bachelor of Arts degree), AST-Business, AAOT, or AGS degrees. Students are highly encouraged to work with a university transfer adviser to choose the right courses.

Code	Title	Credits
EC201Z	Principles of Economics I: Microeconomics ★	4
EC202Z	Principles of Economics II: Macroeconomics ★	4
