Theatre arts provides opportunities for students seeking professional careers in theatre both onstage and behind the scenes as well as opportunities for non-majors to participate in contemporary and classical works. Through classroom study, studio preparation and college productions, students develop a firm foundation in a rich diversity of theatre arts, balancing theory with practical application. Our beautiful facility includes a 500-seat proscenium theatre equipped with state-of-the-art rigging and lighting systems and a 99-seat black-box studio/theatre.

## Curricular Outcomes

At the completion of this curriculum, students should be able to:

- Identify, interpret and apply stage and blocking terminology; read and execute technical drawings for scenery and lighting
- Speak and write fluently about performances, correctly using the specific vocabulary of the art and craft
- Work independently and as an ensemble team member in accomplishing performance and production tasks
- Present an expressive, disciplined performance of a scene and/or monologue in a manner that is original, lucid and well-crafted and/or present a completed production design demonstrating process from script analysis to concept development to final presentation
- Create a résumé and support materials (head shot and/or portfolio) suitable for an interview in professional or educational theatre
